Fraol Admasu

IT Specialist | Full-Stack Developer & Database Administrator |
Cybersecurity Enthusiast | Microsoft Tools | Visual Content Designer
Addis Ababa, Ethiopia

Summary

Hello! I'm Fraol Admasu, an aspiring Web Developer and Database Administrator with a passion for building efficient, user-friendly, and impactful digital solutions.

My expertise includes frontend and backend web development, database design and management, and the technologies required to develop and maintain dynamic web applications. Through my academic studies and personal projects, I have gained hands-on experience in developing web-based systems, managing databases, and creating IT solutions that address real-world challenges.

I enjoy transforming ideas into practical applications and solving complex problems through technology. I work well both independently and in collaborative team environments, taking initiative and continuously seeking opportunities to expand my technical skills and knowledge.

I am particularly interested in leveraging technology to improve business processes, streamline data management, and develop scalable solutions that create value. My goal is to contribute my technical expertise, creativity, and problem-solving abilities to innovative projects while continuously growing as an IT professional.

I am always eager to learn new technologies, adapt to evolving challenges, and make a meaningful impact through technology.

Experience

Shager City First Service Center MESOB
Data Entry Specialist
December 2025 - Present (9 months)
Addis Ababa, Ethiopia

The Problem— In the Mezgeb (#####) — the records department of Sheger City's First Service Center — data entry staff face an endless cycle. Every day, truckloads of paper permits arrive from the Construction Department. Each one must be scanned, typed into Excel by hand, renamed by permit code, and filed into the correct sub-city folder. It is repetitive. It is error-prone. And it is painfully slow. Why I Built It— I saw their workflow up close. I knew how to build web applications. So I asked a simple question: What if the data was digital from the moment it arrived? That question became Mesob — a permit management platform purpose-built for Ethiopian city government workflows.

Piya's Federal First Instance Court

Information Technology

August 2024 - October 2024 (3 months)

Addis Ababa, Ethiopia , Piyasa

Piya's Federal First Instance Court

Information Technology Department - Web Development & Database Administration
